# HEATME SMART INDUCTION HEATING SOLUTION

DESIGNED FOR THE CATERING TRADE

## COSY WARMTH, EASY HANDLING, AWARD-WINNING DESIGN

During the development of the **heatme® smart** induction heating cushions, we intensively analysed the catering trade's requirements and needs.

The outcome is a heating pad that stands out for its unparalleled ease of use, exceptional performance, and distinctive design.

The judges agreed and honored the **heatme® smart** system as the best product in its category with the ***red dot - best of the best 2023*** Design Award.

## MINIMAL EFFORT MAXIMUM IMPACT

The **smart** cushions have a charging tower for convenient storage and recharging. Once fully charged, the built-in LiFePo battery offers 8 to 12 hours of continuous use.

At the end of the day or whenever the battery runs low, simply place the cushion back into a compartment of the charging tower.

It automatically begins to recharge using cutting-edge induction charging technology, requiring about 4 hours to recharge fully from empty.

By the next day, the cushions are ready to be removed from the tower, fully charged to provide cosy warmth to more guests.

**It couldn't be simpler.**

## HEATME SMART

### COMFORT FROM CLOSE-BODY WARMTH

Cosy warmth and maximum ease of use:

**heatme® smart** cushions from MOONICH enhance your customers' comfort and dwell time.

Thanks to their intelligent energy management, these innovative cushions offer cosy warmth and maximum ease of use. Powered by a long-lasting and highly efficient lithium iron phosphate (LiFePo) battery, these cushions quickly reach the desired operating temperature when switched on.

With three heating levels, you can adjust the heat intensity using the cushion control tab. A temperature of around 40°C ensures a cosy warmth. An ingenious sensor automatically switches off the cushion within minutes after the user stands up, saving energy and prolonging operational time.

The **heatme® smart** cushions are available in sizes of 30 x 40 cm and 40 x 40 cm. Upon request, a round version with a diameter of 40 cm is also available.

### SMART CUSHIONS IN CLASSIC COLOURS AND MADE OF HIGH-QUALITY FABRICS

Choose from five timeless, classic colours. The cushion covers are crafted from high-quality, UV-resistant, and easy-care fabrics.

They are removable and washable, and a waterproof inner cover protects the inner cushion from moisture.

The **smart** cushions can be printed or embroidered with names and logos.

---

You can choose from the following 5 fabric colours:

Ivy

Ocean

Beach

Graphite

Brick

best of the best

## TRULY SUSTAINABLE

**heatme® smart** saves up to 95% energy and, therefore, emissions.

The smart sensor in the cushions ensure heating only when occupied, eliminating energy wastage!

## MORE TURNOVER

**heatme® smart** provides your guests with pleasant warmth, encouraging them to stay longer, even on outdoor terraces.

This increases per capita turnover and ensures your guests will be eager to return.

## LESS COSTS

**heatme® smart** saves money!

The heated cushions offer your guests warmth with maximum efficiency and without noticeable losses. By heating only occupied seats, neither precious energy nor money is wasted.

*"We want to inspire our guests and this is a piece that makes a positive part of this."*

*Hotel Post, St. Johann Tirol  
Maximilian Blumschein, Owner*

*"Our guests appreciate the service and the warmth while they enjoy the first and the last rays of sunshine."*

*Haus Delecke, at Möhnesee  
Silke Sarnowski, Directress*

## HEATME SMART-CHARGING TOWER

### INNOVATIVE INDUCTION TECHNOLOGY

Designed for easy use, these cushions are ideal for restaurateurs and event organizers looking to enhance their guests' comfort. Effortlessly slide the **smart** cushions from the charging tower with a single movement, and they're ready to use.

### No additional personnel is needed.

With the built-in LiFePo battery, **heatme® smart** cushions can operate for up to twelve hours, depending on the heating level. The current battery charge level can be monitored during use and charging via the operating flap.

Charging the **smart** induction heating cushions is a breeze with the smart tower. Place the cushion in one of the tower's charging compartments, and the charging process begins. It couldn't be simpler!

The cushion and the tower are designed as one unit, meaning the cushion cannot be charged without the smart tower, deterring theft.

A lockable cover is available for every tower upon request for added security.

## SUSTAINABILITY AND CLIMATE PROTECTION

The **smart** induction heating system from **heatme**® is a climate-friendly, cheaper alternative to conventional heating. Unlike mushroom heaters, the energy management of our cushions can reduce CO<sub>2</sub> emissions by up to 95%.

The inclusion of a presence sensor within the pillow and the proximity of heat to the body minimizes heat loss.

## EVERYTHING REPAIRABLE

We prioritize the sustainability and longevity of our **smart** cushions. Manufactured in Europe, **heatme**® **smart** cushions help avoid the greenhouse gas emissions associated with long transportation routes.

The batteries feature an exceptionally long service life: after 3 000 charging cycles, or more than 8 years of daily use and charging, they retain 80% of their capacity. We offer a three-year warranty on the **smart** system.

Should a repair become necessary against all odds, all components, down to the individual cables, can be repaired or replaced.

## SMART DOUBLE CUSHION

### HEATED SEAT AND BACK CUSHION

For ultimate heating comfort, we present the **heatme® smart** double heating cushion, designed to warm simultaneously both the seat and the back.

Similar to the single cushion model, this version is operated through a control flap. The cushion delivers a heat output of 2 x 15 W at the touch of a button, evenly distributed across the seat and back areas.

Equipped with a 20 000 mAh LiFePo battery, the **smart** double cushion offers unparalleled heating comfort for up to 4 hours.

### RETROFITTABLE AND COMPATIBLE WITH THE SMART TOWER

Every **heatme® smart** cushion is designed for versatility, allowing it to be easily upgraded to a double cushion configuration. This is made possible through a straight-forward clamp connection, enabling the back cushion to be securely attached to the seat cushion.

Disconnecting the **smart** seat cushion from the back portion for charging is a simple process that can be completed in seconds. For charging, the seat cushion is inserted into an empty slot of the charging tower without the back section.

Once the battery is fully charged, the cushions can be quickly reassembled by clamping and reconnecting them. This ensures your guests can enjoy additional hours of comfort and warmth.

## SMART - ADVANTAGES AT A GLANCE

- Simple, contactless charging process
- No additional personnel needed
- Different heating profiles for different applications
- Long battery life with 20 000 mAh
- Highest safety level thanks to LiFePo battery
- Investment security thanks to durable components
- Energy-saving operation (max. 15 W energy-optimized thanks to EMS system)
- Sustainable due to extended service life (spare parts and repair service)

# HEATME CLASSIC BATTERY HEATING CUSHION

FOR SMALLER GASTRONOMIC APPLICATION

## SENSOR-CONTROLLED BATTERY HEATING CUSHION, EASY WARMTH FOR INDOOR AND OUTDOOR USE

Classic-chic and indispensable:  
the **heatme® classic** heating cushion provides cosy warmth  
as soon as you sit down.

This is thanks to an intelligent automatic sensor system  
that only heats the cushion on contact and saves electricity  
when you stand up again.

The centrepiece is a replaceable battery in combination with  
the intelligent sensor system.

## SIT WARM - 24/7

The good thing about the **heatme® classic** cushion is, that  
thanks to the replaceable battery, it is always ready for use  
- around the clock - 24/7. Should a battery become weak or  
empty, it can simply be replaced or recharged directly in the  
cushion in the **Qubo** or **Quada** charging racks.

The battery can also be a charger/power bank for other  
mobile devices.

---

The **heatme® classic** cushion is available in 12 colours:

Black

Dark Grey

Dark Blue

Light Blue

White

Yellow

Fuchsia

Red

Taupe

Sand

Olive Green

Dark Green

## CLASSIC - ADVANTAGES AT A GLANCE

- Replaceable battery
- Intelligent ON/OFF sensor
- Battery life up to 3 h
- High-quality Li-Ion battery
- Available in 12 colours
- Removable and washable covers
- Easy to personalise with printing or embroidery
- Theft protection - optionally lockable on the flap

### Sizes:

30 x 40 x 4 cm  
40 x 40 x 4 cm

**Power:** Max. 15 W

**System:** 12 V

**Battery:** Li-Ion-Battery 3 200 mAh

### 12 colours:

Black, Dark grey, Dark blue, Light blue, White, Yellow, Red, Fuchsia, Olive green, Dark green, Taupe, Sand

### Charging rack Qubo und Quada:

With 6, 12, 24 and 36 charging stations, only 1 socket required

**Heating time:** Up to 3 h

### 1 heating level:

Core temperature 40°C

**Warranty:** 2 years, battery 1 year

### CE marking:

DIN-standard, European EN and international IEC standards

## LOADING RACKS QUBO AND QUADA

The **classic** heating pad can be conveniently stored and charged in our **Qubo** (for 6 cushions) and **Quada** (for 12 cushions) charging racks.

These loading racks are stackable and are also available in versions for 24 and 36 cushions.

Recognizing the need for flexible and space-saving solutions for the catering industry, we offer our **Qubo** and **Quada** racks with casters, allowing them to be quickly and efficiently moved as needed.

The batteries only need to be connected to the charging plugs on the rack to charge the cushions; there is no need to remove them from the cushion.

Regardless of the charging rack version, only a single socket is required to power the cushions during the charging process.

## HEATME HOME BACK HEATING CUSHION

COSY HEATED CUSHIONS TO LEAN ON

### BACK HEATING CUSHION WITH BATTERY OPERATION: COSY COMFORT FOR BOTH INSIDE AND OUTSIDE SETTINGS

The **heatme® home** cushion offers comforting warmth for your back, transforming any favourite spot into a cosy retreat.

Operable with the **heatme®** power bank, it provides up to 8 hours of continuous warmth - enough for enjoying a sundowner or a comfortable evening with friends.

Alternatively, any standard USB power bank can also power the cushion.

### THE ALL-ROUNDER:

The **heatme® home** is versatile enough to enhance any setting. Whether for a chair, sofa, lounge or even as a cosy addition to a picnic blanket, this cushion delivers comfort wherever needed.

Available in five modern colours, the cushion cover is crafted from a soft, easy-care, exceptionally durable fabric. Should the cover become dirty, it's easily removable and washable, ensuring your cushion remains pristine.

and international IEC standards

# THE NIMMA BATTERY HEATING CUSHION

## HEATED DOUBLE CUSHION

### BATTERY-HEATED CUSHION WITH SEAT AND BACK WARMING

Enhance your comfort with the **nimma** heating cushion. Designed for comprehensive warmth, the **nimma** cushion warms the entire body with its heated back and seat surfaces. The rechargeable battery offers a substantial 3 hours of heating time.

Featuring an intelligent sensor, the cushion activates heating only when occupied and automatically turns off two minutes after being vacated. Need to recharge? The battery is conveniently designed for easy charging, replacement and connection.

**Size:** Seat surface 40 x 40 cm, Back 40 x 40 cm

**Thickness:** 3 cm

**Overall:** 85 x 40 x 3 cm + 30 cm battery bag

**Battery:** Li-Ion battery 6 800 mAh

**Power:** Max. 30 W

**Heating time:** Min. 2.5 h

**Warranty:** 2 years, battery 1 year

---

The **nimma** cushion is available in grey as standard. Other colours are available on request.

## HEATME LINE HEATED BENCH COVER

PERMANENTLY WIRED MULTIPLE HEATING CUSHIONS

### HEATED BENCH CUSHION FOR MULTIPLE USERS:

The **heatme® line** bench cover offers a versatile solution for heating rows of benches, from short to long.

Its key advantage is the ability to extend warmth across multiple seats by connecting additional cushions 'in line'. Only the first cushion needs to be connected to a power source - a single 220 V socket can power up to 5 **heatme® line** bench cushions, accommodating as many as 15 seats.

These heated seats operate without manual controls; there's no need for an on/off switch. Thanks to our innovative presence sensor, the heating element in each seat activates only when occupied and automatically turns off standing up.

This ensures energy is used efficiently, heating only the seats in use.

### MODULAR DESIGN

Each bench cushion measures 150 cm in length and provides three heated seats.

With the **heatme® line**, up to 5 cushions can be interconnected, enabling us to warm benches up to 7.5 m in length from a single power source.

The heated seats can be individually activated or deactivated without contact, using a specialized tool.

Upon request, unique designs are available in various sizes, fabrics, and colours.

---

You can choose from the following 5 fabric colours:

Ivy

Ocean

Beach

Graphite

Brick

## LINE - ADVANTAGES AT A GLANCE

- Wired / powersupply
- Auto-On/Off, no controller (presence sensor)
- The transformer is attached to the bench
- 3 bench seats per bench top
- Up to 5 bench tops can be connected
- Available in 5 colours

---

**Size:** 150 x 30 cm

**Thickness:** Approx. 4.5 cm

**Transformer:** 48 V

**Power:** 500 W

**5 colours:**

Ivy, Ocean, Beach,  
Graphite, Brick

**1 heating level:**

Core temperature 40° C

**IP rating:** 66

**Warranty:** 2 years

**CE marking:**

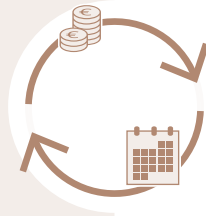

DIN-standard, European EN  
and international IEC standards

## FINANCING

lease

## LEASING

Our advantageous refinancing option allows you to invest in **heatme®** heating solutions.

We have established special arrangements with a renowned German lessor to provide you with attractive terms under a partial amortization plan.

By choosing leasing periods of 24, 36, or 48 months, you can significantly reduce your capital commitment.

Custom terms are also negotiable to suit your needs.

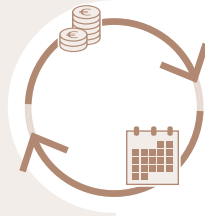

Upon completing the primary lease term and paying a residual value, typically 10%, ownership is transferred to you, the lessee.

This financing option safeguards your liquidity while enabling immediate use of our products to boost sales or enhance your business operations.

## FINANCING

rent-to-own

### HIRE PURCHASE

This financing method allows you to become the beneficial owner immediately and, after a term of your choosing, the legal owner.

Like leasing, the investment product itself serves as collateral. However, a key distinction is acquiring ownership of the products and recording them as assets on your balance sheet.

Unlike leasing, VAT on the total investment is payable upfront in a single payment.

Monthly payments then cover only the interest and principal repayment for the purchase.

This financing option safeguards your company's liquidity, allowing our products to be utilized immediately to increase sales or extend customer dwell time.

A person wearing a tan suit jacket is holding a dark green tote bag. The bag has a circular logo in the center with the text "your Logo" written in a black, sans-serif font. A red strap is visible on the left side of the bag. The entire image is framed by a white dashed border.

Logo

## FINANCING

sponsorme

## SPONSORING

Sponsoring with **heatme**<sup>®</sup> allows brand manufacturers to distinguish themselves as 'heat donors'.

The sponsor's logo and corporate colours can be prominently displayed on our heating solutions through printing or embroidery. This customization is achievable even in small quantities.

Sponsors have the flexibility to cover partial or complete costs. Furthermore, this sponsorship can be integrated with other financing options.

Communication between the sponsor and production is facilitated through the customer; with **heatme**<sup>®</sup> serving as the intermediary. We ensure the delivery of the finished product tailored to the sponsor's specifications.

## FINANCING

### rentme

### RENT

For events of any duration - from a single day to an entire season - we offer the flexibility of accessing our rental pool.

Choose from individual **heatme**® heating solutions or a complete set with a charging tower, ensuring your events stay comfortably warm and cost-effectively.

Our sales team is ready to craft a personalized offer tailored to your needs. For more details, please get in touch with us directly.

### pay-per-use

### PAY PER USE

An innovative refinancing option is our „Pay-per-use“ model, which allows for the individual billing of **heatme**® heating solutions per guest.

This concept enables restaurants and hotels to offer an added layer of comfort, providing warmth throughout their stay. Guests are billed separately for this service on their consumption bill, creating **new revenue streams**. Direct payments from customers boost profitability and enhance guest satisfaction. This model not only contributes to the financing of the heating solutions but also elevates your business's appeal to potential customers.
